Board leadership in the Fintech world: creating a community of the willing and the able. Ms Rodria Laline, CEO Intrabond Capital, www.intrabond.com

Location: Auditorium and break-out rooms

Leading at board level at the growth curve of a start-up to scale-up is not about creating and selling a vision to people and then somehow inspiring them to execute it. It is about creating a community "willing" and "able" to generate new ideas and about boards understanding "openness" while pivoting through the four governance and leadership quadrants.
